Regulating Gas / Oil Burners

- Low NOx
- High Glass Bath Coverage
- High Luminosity
- Low Maintenance
- Adjustable Flame Length/Width

Accessories:

Burner Brackets, Burner Sealing Plates, Flexible hoses, Non-Return valves, Cooling and Purging Air systems.

Combustion Technology

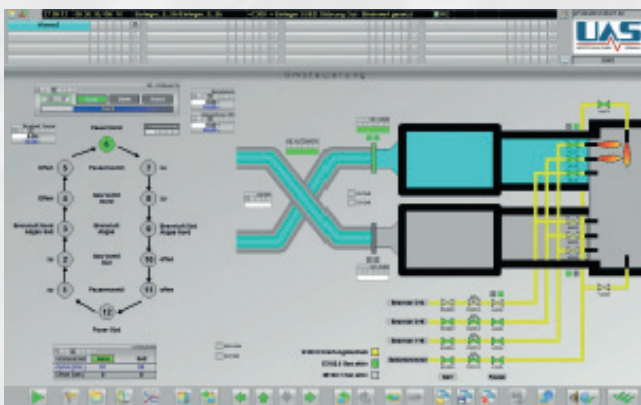

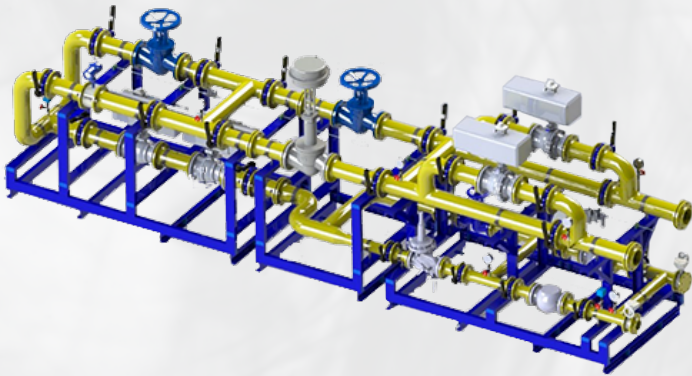

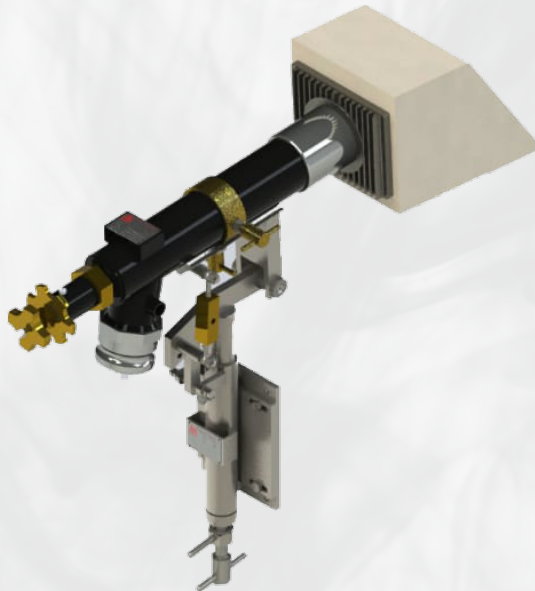

Flexible combustion systems with integrated and innovative automation solutions guarantee the highest level of system availability

- Precision Flow Control Systems enable energy saving during operation
- All Skids pre-wired and pneumatic controls pre-connected
- TIG welded / ISO Standards / Certified Welders
- Pressure Test to EN Norm
- Leak and System Test to EN 746-2:2010

DSC Furnace Control

As each Furnace is an individual masterpiece, each DCS and Furnace Control will have individual functions for your need.

Consistent and innovative automation solutions guarantee the highest level of system availability.
